Canvas

Canvas Office Landscape is the result of Herman Miller's holistic perspective on work environments and the collective experience of work. Canvas landscapes are designed to mirror an organization's culture and raise the level of its performance. A simple set of Canvas elements creates surround, structure, surface, storage, and support for the complete range of workspaces, from private offices to benching and linear planning to group spaces.

Canvas landscapes give people choices about how and where to work. They create aesthetic and functional harmony across an entire floorplate. They help people and their technology stay connected.

Warranty: 12-year, 3-shift

Product Highlights

- Flexible: Enables change and growth over time.
- Adaptable: Applications range from traditional to very open and collaborative.
- Kit of parts: A concise set of integrated components provides choices for working in a variety of ways and for a variety of refined aesthetics.
- Welded, unitized frame construction.
- Universal connectors with strong and precise threaded-bolt connections
- Power and data routing and access every 11" of grade height.
